“CUSTOMER DEFINED UPGRADES”

How to improve a best-selling camper trailer?

Easy, keep all the features that have given proven value to the trailer and add-on what can make it even more successful. What makes it a best-selling unit in the first place? A solid frame of 100 x 50 x 4mm hot dip galvanised steel, our tried and tested fully adjustable independent suspension with twin shock absorbers, heavy duty All-Terrain tyres on durable 16" alloy wheels, a large foldable boat/luggage roof rack taking 150Kg, front tool box that fits 2 x 20L jerry cans and twin adjustable gas bottle holders that can suit both 4.5kg and 9kg gas bottles and twin water tanks with a combined capacity of 155L.

What did we upgrade? The hitch has been upgraded to the much praised McHitch off-road hitch delivering a much smoother towing experience. As storage space is often a key decision point, the Stirling GT Mk2 brings storage space to a whole new level with an extra double trailer-width storage compartment at the rear, fitting poles bags, fishing rods etc. We have opened up the carpeted storage compartment on the driver's side of the front utility box to allow enough storage space to fit the larger camping gear such as solar panels, camp chairs and tables.

“EXCEEDING LEVEL OF COMFORT”

With the re-designed power/water tank control panel, re-located near the kitchen, you no longer need to face weather conditions or bugs to switch on the 200Ah battery power for the full interior LED lighting or the outlets for your fridge, smart phone or tablet. Internal and external speakers are connected to a modern Bluetooth multimedia system with USB, CD player as well as a 17in LCD Screen and DVD player, all nicely tucked away inside. The leatherette button-free cushions might be seen as luxury, but when it comes to cleaning up spills & dust, you will appreciate the ease of wiping down our new choice of interior fabric. On top the bamboo floor keeps the Stirling GT Mk2 easy to clean while giving the interior a high quality finish. In addition, you can enjoy privacy by separating the main bed area with our canvas privacy screen while the seating area can be transformed into another double size bed. Cooking at the gas plumbed 4 burner stove has never been more rewarding. The splash guard, handy slide out preparation space, cutlery draw and our brand new dry rack will give you that extra panache.

“EASY SET-UP, BECAUSE IT MATTERS”

One of the big advantages of hard floor trailers is their quick setup time and the Stirling GT Mk2 is the fastest of all the K-Series trailers to both setup and pack up. This is perfect if you are planning on moving from place to place taking in everything you can in a limited timeframe. The Stirling GT Mk2 is a forward fold design trailer which means you aren't taking up any more space than the trailers towing footprint. Equally it's fast to pack down and can be setup by anyone, young and old, thanks to the smartly placed winches, taking all the heavy lifting out of the equation. The thick 450gsm Fine Weave canvas and midge-proof mesh on all the windows and doors protects you from nature's elements while you're cozy nested inside. Add on the extension annexe and you instantly double your living space to a combined size of over 18 square meters. Zip on the walls, Velcro the floor and you have a huge undercover area adequate to satisfy sleeping over friends, family or kids.
