ALBANY Z

“COMPACT, SLEEK & READY FOR ACTION”

Indicated by many as being 'cute', the latest addition to our rear-folding range, has the same stylish and sleek design and impresses every single step of the way. The Albany Z, combines lightweight specifications with the grandeur of its bigger brother GT. The Albany Z comes with an 80L water tank, 100Ah battery, butterfly screw steel poles and a 4 stove burner kitchen with slide-out work bench, along with dry rack and splash guards. The drawbar and chassis are built from 3mm Q345 steel tubes and fully hot-dip galvanized after welding. The panels are 1.2mm thick zinc galvanized plates.

With a TARE of 1140Kg, this lightweight trailer can be towed by many cars. However light doesn't mean it lacks in tow capacity. This robust little creature sits on 15" wheels with heavy duty all-terrain tires and our tried and tested fully adjustable independent suspension with single shock absorbers.

“IT'S THE FINER DETAILS THAT COUNT”

Cooking is during camping an important element, and making that easier and family friendlier, is a top priority for Ezytrail. Keeping the reversed kitchen set-up is a must when you want to keep an eye on the little ones. With a fridge slide, fitting the larger fridges available, next to you, bush cooks know that racing around to get the ingredients is history. On top we have added our well praised dry/herb rack, assisting you in making those beautiful camping meals.

Easier is also lifting the storage panel underneath the main bed, by the placements of gas struts. Another two larger storage areas are hidden away underneath the bed area.

All boxes and storage areas come fully lined with marine carpet and the main tent floor and fascia panels are finished in high quality timber laminate, giving you camper that extra luxury feel.

Disclaimer: Features and options are subject to change depending on stock availability. Albany comes in white as standard. Colour variant shown in photographs.

The main tent and annexe set up is apart from being slightly smaller, as versatile and family friendly as the GT. Included is a tropical roof, a nylon ensuite tent, the size of half of the trailer, and the awning for an optional kids room. All screens and doors are finished with high strength fiberglass midge-proof mesh. You can use the standard included walls, floor and skirt to fully enclose the annexe, turning it into a large family, sleeping or seating area covering the entire trailer length including the stainless steel kitchen.

The main tent and awning are made from high quality 450gsm (15.8oz) polycotton fine weave canvas and all stress points are double stitched throughout for durability. With the 1200Nm winch your main tent is set-up/packed up in less than 15'. And on the trailer roof panel, tucked in-between the two pole storage boxes, we have added an integrated storage rack for all your extra luggage.

This lightweight trailer can live up to his bigger brother beyond any doubt.
