LINCOLN Z

"INSPIRED BY OUR CUSTOMERS"

If you love the dual-fold camper design, our new Lincoln Z will tick all of your boxes. Based on the LX, the Z gives you everything that drew you to our best-selling Dual Fold model but in a lighter-weight design without compromising on all those features that made our very first Lincoln so popular. Lincoln Z boasts two 100Ah batteries, 12" electric breaks and the same off-road capability found on all of our K-series making it suitable for any adventure you have planned with your family. We have listened to what a camper trailer makes a success for you.

Set up time. Due to its Ezy connecting fan structure and alloy Quick-Release poles, the set up time is about 4 minutes. With placing four corner poles the overall effort is kept to a minimum. You will feel more inclined to take the camper for a short weekend camping trip.

Storage areas. While designing the interior, we kept the travelling family guiding the practicalities of the camper. Underneath the lounge seats and in front of each double bed, multiple storage areas can be found, giving you the travel comfort for the whole family.

There is even a designated spot for your portable toilet. Speaking about families, with the Lincoln Z, you don't have to go huge to put 4 children asleep. Apart from its two double beds, another double bed can be magically created from the lounge area. Or differently put; after the kids are in bed, you, the parents, can still have a nice drink inside the trailer before you can easily make up the bed.

Power. Smaller in size, yes, but when it comes down to power, in parallel with its bigger brother. With its twin 100Ah deep cycle batteries, 12V and USB outputs, a 50 Amp Mega Fuse and a Volt/Ampere reading panel, you won't run out of power. And do larger families not need more power?

Features. Compromising is surely not in the Lincoln range's dictionary. The Lincoln Z does not make an exception on that rule. With a fully plumbed and certified gas line to the front, a stainless steel kitchen with a 4 burner stove with splash guard, a super handy dry rack and a cutlery draw that leaves the mess home, the Z allows you to make a delicious meal without making one single connection. How Ezy is that? Do we need to mention the usual? 2x adjustable gas bottles of 4.5/9kg, 2x 20l jerry cans and a generous water capacity of 160l evenly spread over 2 water tanks.

Performance. Indeed, features can be nice but can the Lincoln do the walk. Just like his big brothers, the Z is off road certified and its all-terrain performance is supported by independent coil spring suspension, fully adjustable with single shock absorbers.

Standard: K-Series Campers come with a fully enclosable annexe as well as an ensuite and portable toilet. The double stitched canvas is fabricated out of a 450gsm coping with the harsh weather conditions you might find yourself in. And if grey isn't your colour, Ezytrail has 7 colour options to choose from at no charge.

Conclusion: The Lincoln Z is a light-weight camper trailer that even mesmerises the larger families by its features and performance. Come and visit your nearest showroom for a look and feel.
